Subject: Update 5-31-19
Attachments: Tank Levels and Tank Update 5-31-19.xlsx

Here is the update for May 31, 2019.

We are starting the deconstruction of 80-10 now and this will continue through the weekend.

There was heavy rain yesterday so total incident related water increased.

In addition, we started transferring tank 100-35 to tank 8-1.
